The Joint Action on Increasing the Capacity of National Focal Points (NFP) (NFP4Health) is a 40-months action by the European Commission with the main objective of creating and maintaining an innovative ecosystem to facilitate and support European countries in achieving health objectives priorities established for the period 2021-2027. By developing and strengthening the National Focal Points capacities of European Countries, the Joint Action aims to provide quality access to the new EU4HEALTH Programme and to assure the complementarity with other regional, national and EU policies, funds and programmes.

As part NFP4Health, Task 6.3 “NFPs Twinning Programme” aims to share in a structured and output-oriented way approaches, good practices and tools between/among NFPs. Twinning programmes for NFPs focus on countries with low participation rates or newly nominated NFPs, to provide opportunities for exchange of experiences and good practices, in order to improve successful national NFP services. Sharing experiences, skills and ideas enables NFPs to **develop and scale-up approaches, services and tools targeting stakeholders.** This exchange might be more important due to the beginning of the new Work Programmes and it is managed by *virtual* interaction or site visits, to meet the team and learn about a specific set of activities/tools.

Online Twinning programme | August 2024

Moderation: APRE
